

UPDATE IN ANAESTHESIA

WORLD ANAESTHESIA

No 20 2005
ISSN 1353-4882

Editorial

Welcome to Update in Anaesthesia number 20! This edition has been produced by the generous support of the International Relations Committee of the Association of Anaesthetists of Great Britain and Ireland. The Publications Committee of the World Federation of Societies of Anaesthesiologists would like to thank the AAGBI for their generosity and assistance.

This edition covers a number of topics which the editorial team hope will prove practical to our readers. In particular the articles on ketamine, fluid balance and servicing a seized OMV have all been specifically requested. Please continue to send requests for articles.

Readers of Update will be delighted to hear that a series of on-line tutorials are being produced on the website www.anaesthesiauk.com. These are available free of charge, and in time will form an entire curriculum of anaesthesia based topics. The tutorials are produced on a weekly basis, and cover a range of topics including clinical anaesthesia, obstetric and paediatric anaesthesia, basic sciences, regional techniques and intensive care. The tutorials can be downloaded from the website or received weekly by email by contacting carol@world-anaesthesia.org. We look forward to feedback on this new venture.

The WFSA is also trying to increase the numbers of books and journals donated to developing world anaesthetists. If you are working without access to books and journals, and would like to request a book donation, please email carol@world-anaesthesia.org with details of yourself and your hospital.

Please inform us if you change address in order to keep our records up to date

Best wishes

Iain Wilson
Editor

Contents: No 20

- Vasopressors for Subarachnoid Anaesthesia in Obstetrics
- Fluid Management for Emergency Laparotomy in Rural Hospitals
- Perioperative Fluid Balance
- Letter to the Editor
- Changes in Maternal Physiology during Pregnancy
- Ketamine: a Review
